Elements

Emblem

The emblem is part of the wordmark but can be separated from it and used on its own in certain circumstances.

Wordmark

The wordmark consists of the entire logo and should not be separated from the emblem.

AI Sub brand

The AI Sub brand name is seperated with two forward slashes at the exact angle of the 'A'.

Variants

Wide

Use the primary variant in the majority of cases.

Stacked

Use the stacked variant when space is limited or confined.

Colourways

Positive

This is the primary colourway. Use it whenever possible.

Negative

This should be used on dark backgrounds only.

If appearing over photography, the background in this area should be blurry, low in contrast or overlaid with colour, to ensure the logo is clear and stands out.

Black

This colourway should be used when the logo is placed over brighter backgrounds or when it isn't possible to display the logo in colour.

White

This should be used on darker or coloured backgrounds when there isn't enough contrast to use the Positive logo.

If appearing over photography, the background in this area should be blurry, low in contrast or overlaid with colour, to ensure the logo is clear and stands out.

Which file type should I use?

Logo will appear...	Examples	File type	Info
Digitally, on a **Screen** (RGB)	– Presentations – Webpages – Emails	**PNG**	**In most cases, PNG is the best format to use.** PNGs and SVGs have transparent backgrounds, so they can be placed on top of different colours. SVGs can be scaled to any size and are ideal for webpages.
		SVG	
		PDF if marked as RGB	For use in professional graphic design software.
		What about JPG?	JPGs can appear blurry and have solid backgrounds, so they are best to avoid. Use a PNG file instead.
Physically, in **Print** (CMYK)	– Business Cards – Brochures – Banners	**PDF** if marked as CMYK	Used when laying out graphics for professional printing. Ensure the file marked "CMYK" is used, which means the colours have been adjusted to match the capabilities of printer ink.
		What about EPS?	EPS is a legacy format that has been superseded by the superior format PDF. Anywhere EPS was used in the past, PDF can now be used instead (and should be).

Nogos

Do not squash or stretch

Do not rotate

Do not overlay

Do not re-type

Do not re-colour

Do not re-style

Ed endi denisci piendendam re none iumque perescidusti optat audae veligni mendis eatem

Do not encroach

Ed endi denisci piendendam re none iumque

Do not misalign

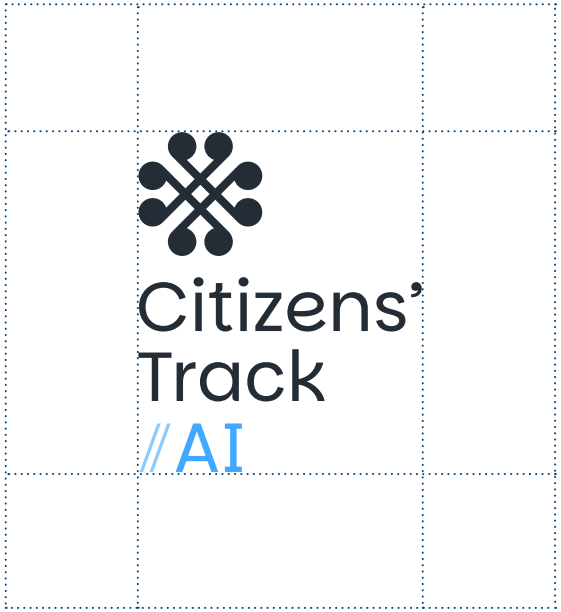

Do not unlock

Layout

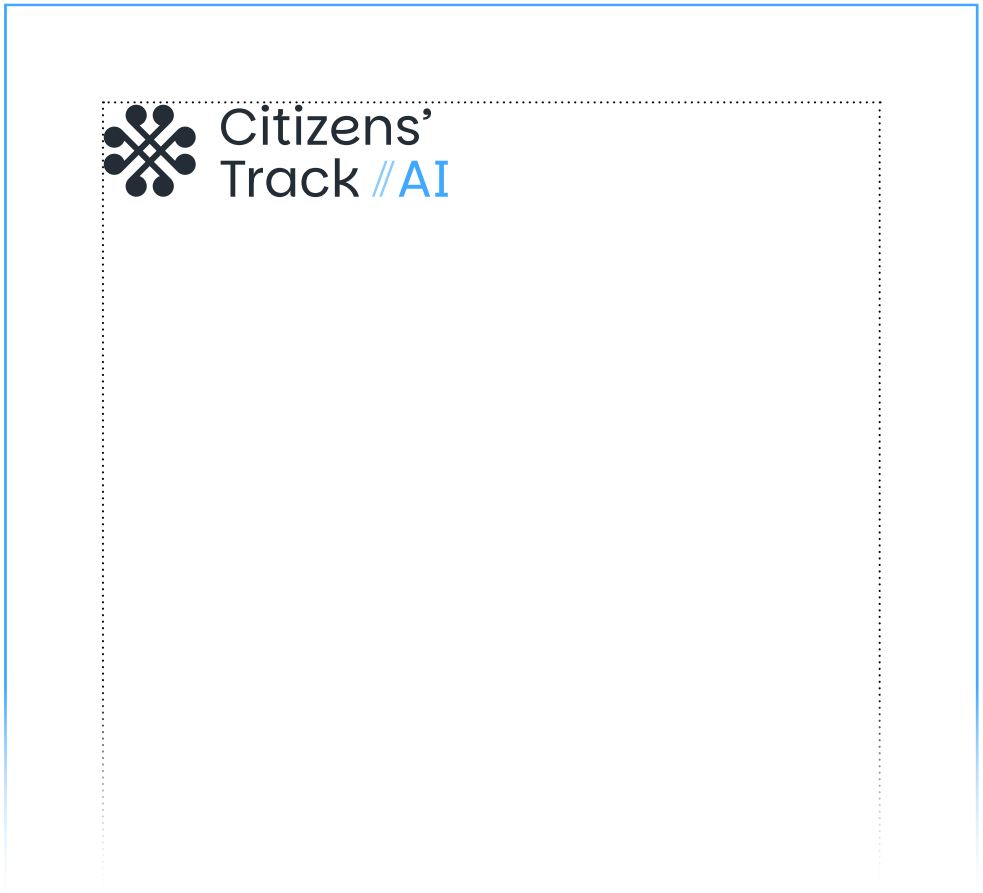

Space

Layouts should consider a clear space around the logo to prevent any secondary material affecting its legibility. This area should be left clear of type, images, shapes and other logos.

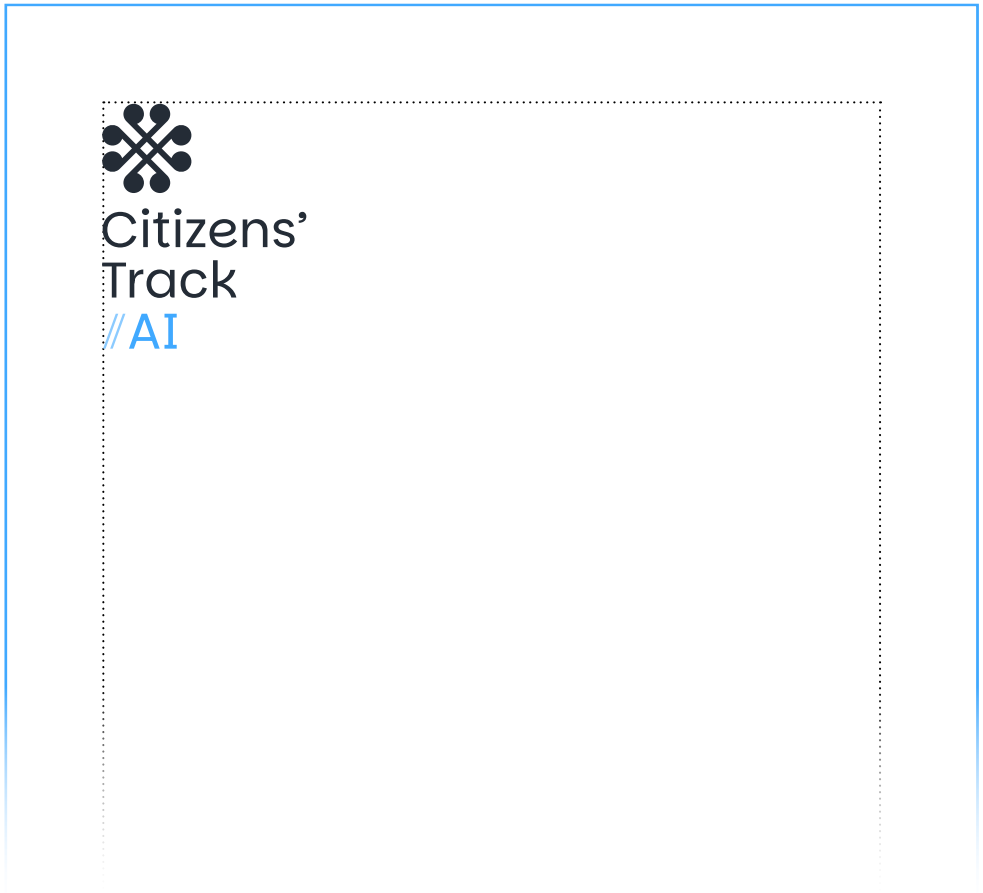

Alignment

Wide

The logo should be placed inside the margin in the corner of the page.

Stacked

Similar to the wide position. The stacked version should line up to the edges of the margin.

Colours

Logo
Colours
Text
Graphics

RGB and Hex

RGB and Hex (#) codes are just two ways of specifying the same on-screen colour. They should only be used when designs will appear primarily in a digital medium.

CMYK

CMYK codes should be used whenever the colours are being printed.

Palette

Primary

The Primary palette should be used for the main elements of a design and should be the design's dominant colours.

Cerulean
R 64 G 169 B 255
40A9FF
C 75 M 34 Y 0 K 0

Fjord
R 0 G 68 B 124

Deep Redwood
R 124 G 0 B 24
7C0018
C 0 M 100 Y 81 K 51

Palette

Combinations

These are some colour combinations you can use when designing for the brand.

You can pair any light colour to any dark colour as long as there is enough contrast.

Do not pair two light or two dark colours together.

Stats in Parkinsans Bold

10%

Parkinsans

Download here

In most materials, the font used for body text (i.e. the main text of the item) should be **Parkinsans**. If this is unavailable, please use **Arial**.
To maintain legibility on printed material, a minimum font size of 10pt should be used. It's recommended to use heavier weights for headings.

Icons

Style

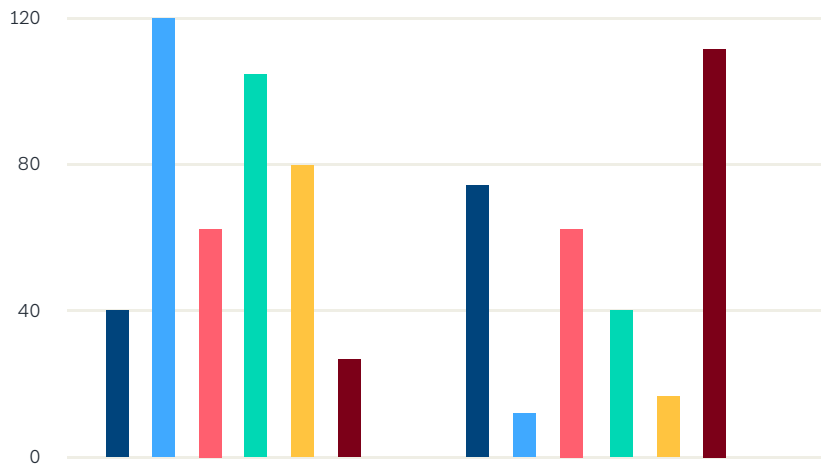

The Citizens' Track AI iconography style follows consistent proportions and line thicknesses.

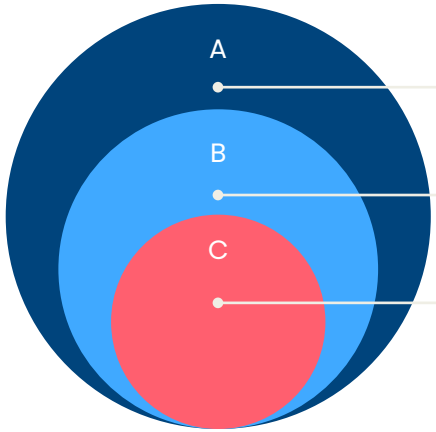

All icons should be outlined using a thin stroke.
